* NOTE: Statewide drills may replace local schedules.

** NOTE: This is the inclement weather makeup date for the TOR test. If the main TOR test runs as scheduled, this test will not run.

*** NOTE: If the FCC issues a waiver to allow the NOAA statewide test to count as an RMT, the March 20th test will not be run.

NOTE: Stations are reminded that these coordinated tests must be run within 60 minutes of reception (or 15 minutes after program begins if the station was off air at test time). This requirement is per FCC rules. Stations are not required to run a local test on weeks that a coordinated test is conducted.
